

Low Cost **RUGER**
Hydraulic Floor Crane

Strange somebody didn't think of it before . . . this effective combination of smooth hydraulic power and cantilever boom that makes light work out of heavy handling jobs in garage and shop.

The Ruger picks up loads right off the floor or at any height within its range . . . lifts or lowers as required . . . travels with load wherever you can push a hand truck.

Works in tight places . . . crane hook reaches over to pick motor right out of chassis . . . special transmission attach-

ment reaches under to remove or replace heavy transmissions.

Only 2 controls: (1) lever that operates hydraulic pump to raise load; (2) release valve to lower the load. Fine-threaded release valve stem enables load to be lowered smoothly, gently . . . fast or slow . . . minimizes danger of accidents. Anyone can operate a Ruger.

Ruger Hydraulic Floor Cranes are built in 1-ton, 2-ton and 3-ton sizes. Write for bulletin to nearest address below.
